Software engineer, Lecturer and Master's graduate with **3+** years of experience adapting to multiple programming languages and game engines. My core specialisations include networked multiplayer programming, XR development, and mobile development with a focus on performance optimisation and system stability. With strong skills in end-to-end project ownership, team leadership, and academic mentoring, I aim to leverage my versatile problem-solving abilities and passion for games to help a studio create highly engaging, optimised games.

Skills

Programming Languages & Frameworks: C# – C++ – Python – .NET – Node.js

Game Engines & Multiplayer: Unreal Engine 5 – Unity – Photon Fusion – Azure PlayFab

Tools & DevOps: GitHub – Perforce – Jenkins – Jira – Firebase

Specialised Skills: Network Programming – AI and Physics Programming – Game Engine Development – XR and Mobile Development

Experience

Lead Developer – [Nexus Arcade Studio](#)

May 2025 – Present

- Led the revitalisation and ongoing development of a **mixed-reality** arcade game for Meta Quest 3, delivering multiple game modes including bowling, kart racing, boxing, and shooting.
- Architected and implemented multiplayer and co-location gameplay for kart racing and bowling using **Photon Fusion** with full-body networked avatars for immersion.
- Stabilised and optimised performance, delivering **up to 60%** gains in both stability and framerate, significantly improving the player experience and retention.
- Contributed to sustained growth, with Meta Analytics showing **up to 40%** month-over-month increases in active users and install base.

Lecturer – SAE Institute UK

March 2025 – Present

- Deliver lectures in Game Programming covering **C# and C++**, using **Unity** and **Unreal Engine 5** at the Bachelor's degree level.
- Develop, maintain, and continuously update course materials to reflect **current** industry practices and emerging technologies.
- Mentor students through one-to-one sessions as part of the mentorship programme, supporting both academic progress and career development.

Software Engineer - GenlTeam Solutions

February 2022 – August 2022

- Led a team of developers in designing and developing PC and mobile game projects across all phases of development using a variety of technologies.
- Developed a multiplayer tower defence game like Supercell's Clash Royale using Unity and **Photon Fusion Engine**.
- Designed and developed a proprietary multiplayer framework using Photon Fusion technology for company-wide usage.

Unity Developer - Hazel Mobile

August 2021 – January 2022

- Developed and maintained an arcade mobile game, which achieved over **50 million downloads** on the [Play Store](#).
- Boosted game performance by **30%** by using Unity's performance profiler and memory management tools to optimise the game.
- Resolved long-standing critical issues in the game, enhancing stability and user experience, leading to an increase in download rate by **25%**.

Education

- **Master of Computer Science for Games Programming - University of Hull**
September 2022 – February 2024
- **Bachelor of Computer Science - National University of Computer and Emerging Sciences**
August 2017 – July 2021

Additional Information:

- Participant in The Graduate Engineering Engagement Program (GEEP) run by The Royal Academy of Engineering UK, which is a 6-month-long program with active development towards my engineering career, including multiple workshops for building my soft skills.
- Volunteered as a student representative in the Student Union of the University of Hull, helping international students be better represented in university matters regarding employability and career opportunities.
- The Social Secretary of the Drama Society, in charge of managing and organising different social events for the society, along with acting in theatre plays.
